

MARBLE MAZE

MATERIALS:

- CARD STOCK
- PENCIL
- YARN
- GLUE
- MARBLES

Procedure:

- 1. Draw out your maze shape lightly with your pencil onto your paper. Be sure to keep the width between the lines of your maze big enough that your marble will fit in between them.**
- 2. Starting at the top of your shape, trace over your lines with your glue, one little section at a time. Lay the yarn over top of the glue so it stays in place. Continue until you've outlined your whole shape maze with yarn.**
- 3. When you reach the inside of your shape, make a little circle or curved shape with your glue and yarn at the center of your shape – this will be the place where the marble finishes the maze.**
- 4. Place a marble just inside the opening at the top of your shape and try the challenge of gently rocking the shape from side to side to move the marble through the maze!**
