

# Tinker Thinker Thursday

**Pterodactyl Glider Challenge:** Pterodactyls were not dinosaurs, they were flying reptiles and part of the pterosaur family. Some pterosaurs had a wingspan of up to 40 feet! Today you are challenged to design or build a flying reptile glider (paper airplane) of your own!

Go to [pbpetro.org/kids-corner](http://pbpetro.org/kids-corner) for a template. Be sure share your prehistoric creations with us!
