

SUMMER SCIENCE CAMP AGES 8-12

3D PRINTOPIA: THE WORLD OF CREATION JULY 8 - 10, 2025

Campers will leave with a deep sense of accomplishment, having designed and printed their own creations. Whether it's a unique art project or a cool gadget, every child will gain new skills and a creative spark that will fuel their imagination for years to come!

THE SCIENCE OF REACTIONS JULY 22 - 24, 2025

Young scientists will dive into the exciting world of chemical and physical reactions! This camp is packed with fun, hands-on experiments and activities that explore the fascinating science behind reactions in everyday life. Campers will learn how substances interact, change, and create new outcomes, all while sparking their curiosity and building their understanding of chemistry and physics.
