

Summer Science Camp - Sponsored by Oxy

1:00 PM - 5:00 PM

Ages 6-8 Galactic Quest - June 9-11, 2026

Blast off into an exciting space adventure! In **Galactic Quest**, campers explore planets, stars, and galaxies through hands-on science activities and creative engineering challenges. Kids will investigate gravity, build simple space tools, and learn how astronauts explore the universe. This camp sparks curiosity and imagination while building problem-solving and teamwork skills.

Ages 6-8 Ocean Explorers - June 16-18, 2026

Dive into discovery with **Ocean Explorers**! Campers will explore the amazing world beneath the waves as they learn about ocean animals, habitats, and the science of water. Through experiments, games, and building challenges, kids will discover how oceans move, why creatures live where they do, and how we can help protect marine environments.

Ages 6-8 Around the World - June 23-25, 2026

Pack your curiosity and get ready to travel! In **Around the World**, campers explore different countries and cultures through hands-on STEM activities inspired by real places. Kids will build structures, test designs, and solve problems as they learn how geography, weather, and engineering shape life around the globe. This camp encourages curiosity, creativity, and global thinking.

Ages 8-12 Microscopic Marvels - July 7-9, 2026

Get ready to shrink down and explore a hidden world! In **Microscopic Marvels**, campers investigate things too small to see with the naked eye. Using microscopes and hands-on models, kids will explore cells, microbes, crystals, and tiny structures found in everyday objects. Through experiments and investigations, campers learn how scientists observe, record data, and make discoveries—proving that even the smallest things can lead to big scientific breakthroughs.

Ages 8-12 Expedition Earth - July 21-23, 2026

Adventure awaits! In **Expedition Earth**, campers become Earth scientists as they explore the powerful forces that shape our planet. From rocks and minerals to weather, landforms, and ecosystems, kids will investigate how Earth works through experiments, engineering challenges, and interactive activities. Campers will test solutions, analyze real-world problems, and discover how science helps us understand—and protect—our amazing planet.

Ages 10-15 Design Squad - July 14-16, 2026

Think like an engineer and create like a designer! In **Design Squad**, campers tackle hands-on engineering challenges that put creativity and problem-solving to the test. Using the engineering design process, kids will brainstorm ideas, build prototypes, test their designs, and improve them through teamwork and iteration. From constructing sturdy structures to inventing clever solutions, campers learn that failure is part of the process—and innovation comes from trying again. This fast-paced camp encourages collaboration, critical thinking, and confidence as young engineers turn ideas into reality.
